Mumbai, Maharashtra/ India | +91 8655062586 | jkapuriya6@gmail.com | www.linkedin.com/in/ajay-kapuria

Summary

Senior Software Engineer with 7+ years of experience building enterprise applications using the Microsoft technology stack. Experienced in developing event-driven integration systems using Apache Kafka and designing reliable messaging workflows using patterns such as the Outbox Pattern. Skilled in **ASP.NET MVC, WCF services, .NET Worker Services, SQL Server, and SignalR**, with experience delivering production-ready Manufacturing Execution Systems (MES) and real-time operational dashboards.

Technical Skills:

Languages & Frameworks: C#, .NET Framework, .NET Core, ASP.NET MVC, ASP.NET WebForms, WCF

Messaging & Integration: Apache Kafka, Event-Driven Architecture, Message Streaming

Backend Technologies: Windows Services, .NET Worker Services, SignalR

Database: SQL Server, Stored Procedures, Query Optimization

Frontend: HTML, CSS, JavaScript, jQuery, Ajax, Kendo UI

Tools: Git, Jenkins, SVN, Azure DevOps

Testing: NUnit, MSTest, SpecFlow

Cloud & Security: AWS Secrets Manager, Checkmarx, Contrast, ReCaptcha

Professional Experience

Saint-Gobain INDEC (International Centre of Excellence)

Senior Software Engineer

Mumbai, India

April 2024 – Present

Working on **IN4.0RM Manufacturing Execution System (MES)** supporting glass manufacturing plants. Responsible for developing backend integration systems and operational dashboards enabling **real-time communication between plant equipment, MES, and enterprise systems such as EWMS and SAP**.

Key Contributions

- Contributed to the **successful production go-live of the IN40rm Manufacturing Execution System (MES)**, integrating plant manufacturing data with enterprise applications.
- Designed and implemented **Kafka-based event streaming workflows** enabling asynchronous communication between MES and downstream systems, including **EWMS and SAP**.
- Implemented the **Outbox Pattern** to ensure reliable Kafka message delivery and maintain consistency between database transactions and event publishing.
- Developed **.NET Worker Services and Windows Services** to produce and consume Kafka messages for asynchronous manufacturing workflow processing.
- Developed **ASP.NET MVC applications and WCF services** supporting MES workflows, integrations, and operational tools.
- Implemented **real-time production monitoring using SignalR** to display manufacturing events and integration responses on operational dashboards.
- Built **interactive dashboards using ASP.NET MVC, JavaScript, and Kendo UI** to visualize production metrics and workflow status.
- Designed **SQL Server stored procedures and database workflows** to support efficient event processing and maintain system data consistency.
- Provided **post go-live production support**, monitoring Kafka pipelines, troubleshooting integration issues, and ensuring reliable system operation.
- Recognized with the **IN4.0RM Excellence Award at Saint-Gobain International IT Delivery Centre** for contributions to the successful delivery of the IN4.0RM MES platform.

Technologies Used

ASP.NET MVC, Web APIs, WCF, .NET Core Worker Services, Windows Services, Apache Kafka, SQL Server, SignalR, SQL Dependency, Kendo UI, JavaScript

Ness Digital Engineering Senior Software Engineer

Navi Mumbai, India
May 2018 – April 2024

Worked on **Evaluation Systems (CCIS) for Pearson**, supporting and enhancing **25+ enterprise educational evaluation websites** used globally for certification and assessment programs.

Key Contributions

- Maintained and enhanced **25+ enterprise web applications** built using **ASP.NET WebForms, ASP.NET MVC, and WCF services**.
- Improved application performance through **SQL query optimization and caching strategies**, reducing page load times and database calls.
- Resolved **380+ high-level and 350+ medium-level security vulnerabilities** identified through Checkmarx and Contrast security scans.
- Led **Proof of Concept for AWS Secrets Manager integration**, strengthening security for sensitive application configurations.
- Implemented **ReCaptcha security controls**, reducing automated abuse and bot traffic by **60–80%**.
- Optimized environment-specific deployments using **XML Document Transform (XDT)** configuration strategies.
- Led **SpecFlow automation testing POC**, reducing testing effort by approximately **50%**.
- Supported **CI/CD pipelines using Jenkins**, improving build and deployment efficiency.
- Collaborated with QA teams to resolve **WCAG accessibility compliance issues**, improving the usability and accessibility of web platforms.

Technologies Used

ASP.NET WebForms, ASP.NET MVC, WCF, ADO.NET, SQL Server, HTML, CSS, JavaScript, jQuery, Ajax, Jenkins, AWS Secrets Manager, XDT, NUnit, MSTest, Git, SVN, Azure DevOps

Certification

Amazon Web Services Solutions Architect - Associate
Amazon Web Services Cloud Practitioner

December 2022
November 2022

Education

Bachelor Of Computer Engineering

St. John College of Engineering and Management, Palghar, India

May 2017
